

### FILIPPO ATTIVISSIMO:

Filippo Attivissimo received the M.S. and the Ph.D. degrees in electronic engineering from the Polytechnic of Bari, Italy, in 1993 and 1997 respectively. Since 1993, he has worked on research projects in the field of digital signal processing for measurements with the Polytechnic of Bari. He is presently Associate Professor in electric and electronic measurements with the Department of Electrics and Electronics of the same Polytechnic. His main research interests are in the field of electric and electronic measurement on devices and systems, estimation theory, uncertainty evaluation, design of sensors for industry, medicine and transportation, digital measurements on power electronic systems, computer vision and A-to-D converter modelling, characterization and optimization. Dr. Attivissimo is a member of the Italian Association “Electrical and Electronic Measurements Group” (GMEE).
